How to Draw Rocket — Free Practice Sheets

ANSWER / CASE 1

rocket: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

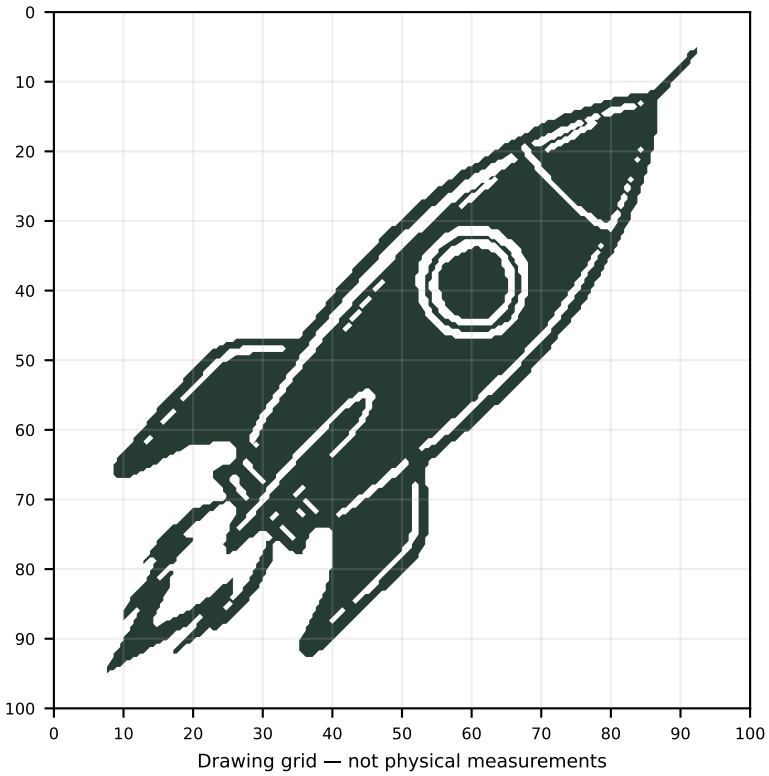

ANSWER: Example solution: preserve cylindrical body with a rounded, tapered outline, pointed nose cone separated by a curved line, two visible side fins and a central lower fin. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main body as a long, slightly tapered oval/cylinder tilted diagonally.
2. Add the pointed nose cone at the top with a curved dividing line across the body.
3. Draw the circular porthole on the upper-middle section of the body.
4. Attach the fins: two swept-back side fins and one lower central fin near the base.

How to Draw Rocket — Free Practice Sheets

ANSWER / CASE 2

rocket: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

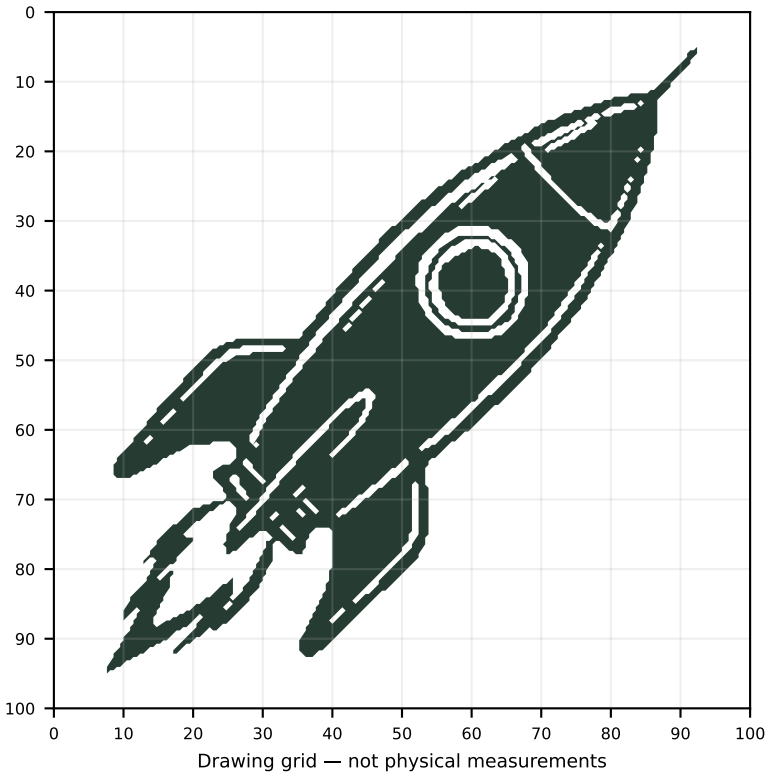

ANSWER: Example solution: preserve cylindrical body with a rounded, tapered outline, pointed nose cone separated by a curved line, two visible side fins and a central lower fin. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main body as a long, slightly tapered oval/cylinder tilted diagonally.
2. Add the pointed nose cone at the top with a curved dividing line across the body.
3. Draw the circular porthole on the upper-middle section of the body.
4. Attach the fins: two swept-back side fins and one lower central fin near the base.

How to Draw Rocket — Free Practice Sheets

ANSWER / CASE 3

rocket: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

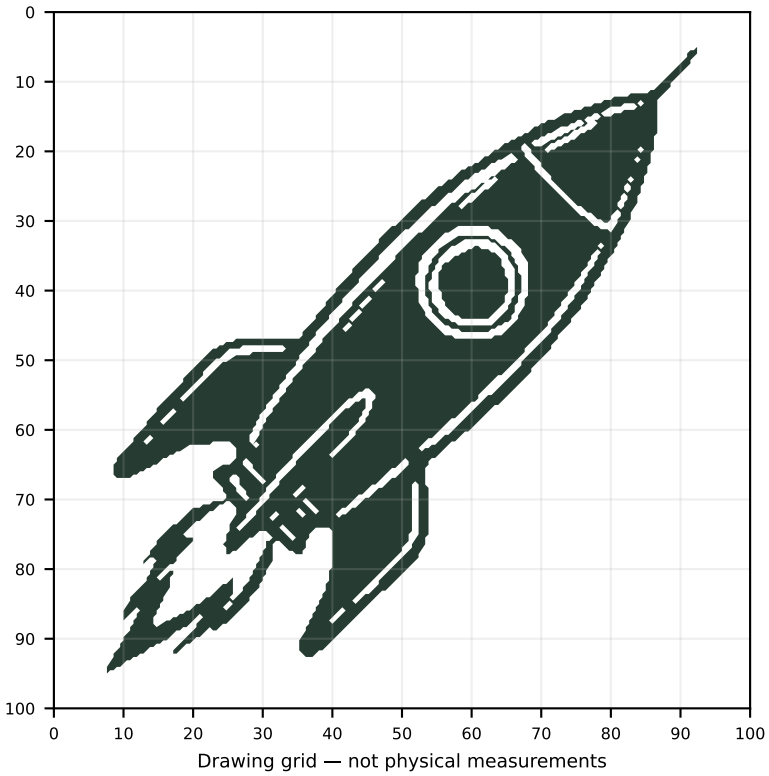

ANSWER: Example solution: preserve cylindrical body with a rounded, tapered outline, pointed nose cone separated by a curved line, two visible side fins and a central lower fin. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main body as a long, slightly tapered oval/cylinder tilted diagonally.
2. Add the pointed nose cone at the top with a curved dividing line across the body.
3. Draw the circular porthole on the upper-middle section of the body.
4. Attach the fins: two swept-back side fins and one lower central fin near the base.

How to Draw Rocket — Free Practice Sheets

ANSWER / CASE 4

rocket: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve cylindrical body with a rounded, tapered outline, pointed nose cone separated by a curved line, two visible side fins and a central lower fin. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main body as a long, slightly tapered oval/cylinder tilted diagonally.
2. Add the pointed nose cone at the top with a curved dividing line across the body.
3. Draw the circular porthole on the upper-middle section of the body.
4. Attach the fins: two swept-back side fins and one lower central fin near the base.
