Owl Line Drawing: Single-Weight Contour Practice

REFERENCE PLATE AND WARM-UP REDRAW FRAME

Use the original outline on the left as a guide. Make a single-weight redraw in the blank frame. The next four pages contain the four complete practice tasks.

Uniform contour / outline only

Redraw the owl here

Keep the same line weight

- [ ] I used one visible line weight.
- [ ] I checked the required features and the smooth-wing rule.
- [ ] I removed accidental shading, hatching and extra marks.

The following task2 asks for a blank body interior; omit internal wing curves for that particular drawing. The comparison task deliberately includes one incorrect feather-edge version.

Owl Line Drawing: Single-Weight Contour Practice

EXERCISE 1 / PRACTICE

Draw an owl with a round head and oval body using one pen. Include two eye circles, a triangular beak, and one wing curve on each side. Keep every line the same weight. Do not add shading or feather detail.

- [ ] I used one visible line weight.
- [ ] I checked the required features and the smooth-wing rule.
- [ ] I removed accidental shading, hatching and extra marks.

My contour / feature check: _____
My label or correction note: _____

Owl Line Drawing: Single-Weight Contour Practice

EXERCISE 2 / PRACTICE

Draw an owl with a face disk made of two smooth curves that meet near the beak. Add a tail wedge below the body. Use one uniform line weight and leave the body interior blank.

- [ ] I used one visible line weight.
- [ ] I checked the required features and the smooth-wing rule.
- [ ] I removed accidental shading, hatching and extra marks.

My contour / feature check: _____
My label or correction note: _____

Owl Line Drawing: Single-Weight Contour Practice

EXERCISE 3 / PRACTICE

Draw two owls side by side in single-weight contour line. The first owl should have a larger head; the second should have a smaller head. Both must include eyes, beak, face disk, body, tail, and wing edges. No shading.

- [ ] I used one visible line weight.
- [ ] I checked the required features and the smooth-wing rule.
- [ ] I removed accidental shading, hatching and extra marks.

My contour / feature check: _____
My label or correction note: _____

Owl Line Drawing: Single-Weight Contour Practice

EXERCISE 4 / PRACTICE

Draw an owl in single-weight contour line, then draw a second version where the wing edge is one smooth curve instead of a scalloped feather edge. Label which version follows the contour rule.

- [ ] I used one visible line weight.
- [ ] I checked the required features and the smooth-wing rule.
- [ ] I removed accidental shading, hatching and extra marks.

My contour / feature check: _____
My label or correction note: _____

For this comparison only, draw and label the feather-edge example and the corrected smooth-edge example. Keep both unshaded.
