Draw an Upside-Down Jellyfish: Bell Orientation and Tentacle Layout

FOUR ORIGINAL TASKS / GIVEN TICK GUIDES

Use the given guides, add or correct the requested lines, and leave the two boxes unticked until you have checked your work. Exercise 2 includes a deliberately upright error and an empty correction box; exercise 3 intentionally has one unused tick.

EXERCISE 1

Draw a bell with a downward dome and mark six equal margin intervals. Add six tentacles rising upward. State how many tentacles start at the margin.

Starts: _____

☐ Dome down

☐ Tentacles up

EXERCISE 2

A drawing shows the dome above the tentacles. Describe the smallest change that makes it an upside-down jellyfish.

GIVEN ERROR

YOUR CORRECTION

My change: _____

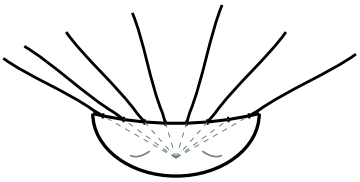

☐ Dome down

☐ Tentacles up

EXERCISE 3

Draw eight margin ticks but only seven tentacles. Add one tentacle and explain where it starts.

GIVEN: 8 TICKS / 7 TENTACLES

Added at tick: _____

☐ Dome down

☐ Tentacles up

EXERCISE 4

Draw an inverted jellyfish with ten margin intervals. Make three tentacles shorter than the others and keep all ten rising upward. State the interval count and the short-tentacle count.

Intervals: ___ Short: ___

☐ Dome down

☐ Tentacles up

☐ I checked dome down and tentacles up on my completed drawing.

☐ I matched each actual tentacle start to one center tick.

☐ I stated my count and explained the requested correction or variation.

Draw an Upside-Down Jellyfish: Bell Orientation and Tentacle Layout

FOUR CLEAN REDRAW SPACES

Use the four original tasks on the first worksheet page. These four clean panels are intentionally empty except for a midline and recording fields. Redraw your completed work without copying the separate answer figures.

CLEAN REDRAW / EXERCISE 1

Count / correction note: _____

CLEAN REDRAW / EXERCISE 2

Count / correction note: _____

CLEAN REDRAW / EXERCISE 3

Count / correction note: _____

CLEAN REDRAW / EXERCISE 4

Count / correction note: _____

- ☐ I checked dome down and tentacles up on my completed drawing.
- ☐ I matched each actual tentacle start to one center tick.
- ☐ I stated my count and explained the requested correction or variation.

No specific paper dimensions, animal proportions, or printing tolerance are prescribed. Choose a comfortable bell size and readable spacing. Add a short note if you use a consistent alternative line convention.
