Image grid transfer / practice

10 columns x 8 rows. Coordinates start at the top-left: x right, y down.

1. Mark the roof apex and the two roof corners.

2. Transfer the house outline one cell at a time.

3. Measure the door width and height in grid cells.

4. Compare the two windows: width, height and alignment.

5. Locate the sun centre; compare the radius with one cell.

6. Check the copy: proportions, corners, alignment and line weight.
