Practice edition - answers

Worked answers / Keep separate from the student sheet.

1. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.

2. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.

3. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.

4. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.

5. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.

6. Draw three curved meridians within a circle. Compare centre and edge curvature; keep shared top/bottom endpoints.

One example is shown in the reference. Check smooth curves, consistent endpoints and progressively stronger curvature; no single camera projection is claimed.
