Dolphin drawing - answers

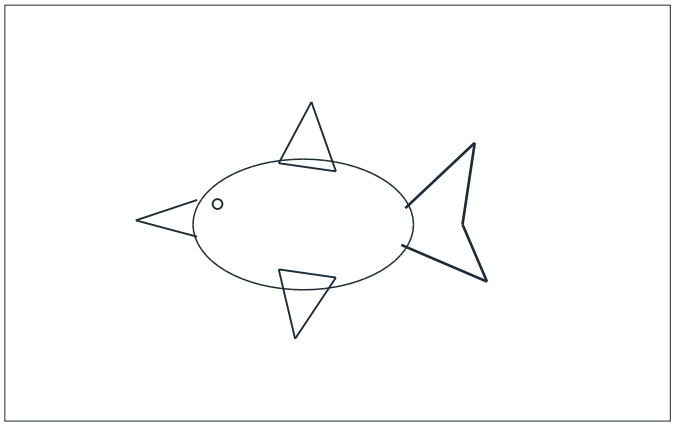

A stylised example. Many drawing solutions are valid; use the criteria below.

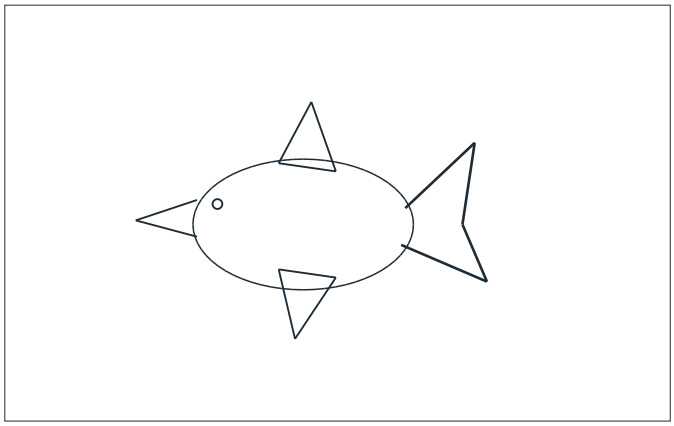

1. Block in the main masses

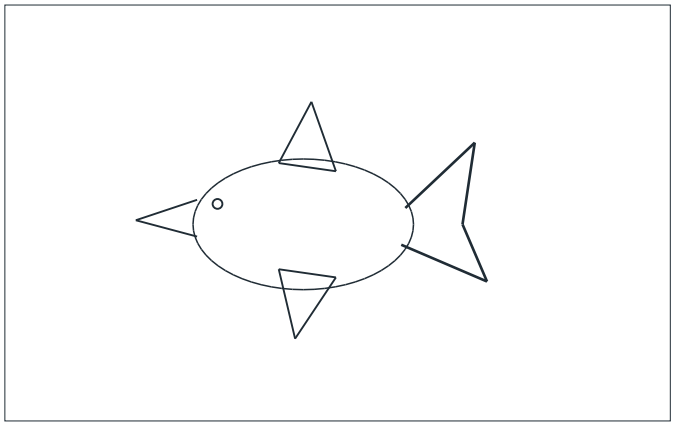

2. Complete the missing structures

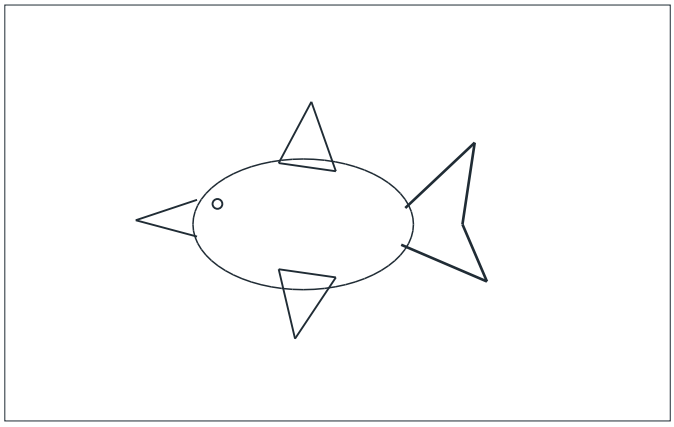

3. Redraw the final silhouette

4. Mirror the construction

5. Change size; keep proportions

6. Add one clear light direction

Check: clear main masses; aligned features; coherent overlaps; deliberate line weight.

The examples show one possible solution, not a single correct artistic answer.
